## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,363,557 to Chou in view of U.S. Pat. No. 5,953,779 to Schwartz.

Claim 1, Chou discloses an apparatus comprising a pillow and left and right end pieces 2 wherein the pillow is substantially softer than the left end piece and the right end piece (col. 2 lines 23-25). Chou fails to disclose a recess in the left and right end pieces. Schwartz discloses a cushion having left and right end pieces (16,17) with a recess and a center piece (14,15) inserted into the recess. It would have been obvious to one having ordinary skill in the art at the time of the invention to employ the recess as taught by Schwartz in order to prevent lateral outward movement of the pillow pieces of Chou.

Claim 2, wherein the recess of the left end piece and the recess of the right end piece have a width, which is about the same as a dimension of the pillow (fig. 1)(Schwartz).

Claim 3, wherein the recess of the left end piece and the recess of the right end piece have a width and a height, which is about the same as a width, and height of the pillow (Schwartz).

Art Unit: 3673

Claim 4, further comprising a sleeve 21, and wherein the pillow, the left end piece, and the right end piece can be inserted into the sleeve while the left portion of the pillow is inserted into the recess of the left end piece and while the right portion of the pillow is inserted into the recess of the right end piece (Chou).

Claim 5, further comprising;

a pillow covering 1, and

wherein the sleeve, the pillow, the left end piece, and the right end piece can be inserted into the pillow covering, while the left portion of the pillow is inserted into the recess of the left end piece, while the right portion of the pillow is inserted into the recess of the right end piece, and while the pillow, left end piece, and right end piece are inserted into the sleeve.

Claim 6, Chou discloses a pillow comprising a pillow and left and right end pieces 2 wherein the pillow is substantially softer than the left end piece and the right end piece (col. 2 lines 23-25). Chou fails to disclose a method of inserting a right portion of a pillow into a recess of a right end piece and inserting a left portion of a pillow into a recess of a left end piece. Schwartz discloses a cushion having left and right end pieces (16,17) with a recess and a center piece (14,15) inserted into the recess. It would have been obvious to one having ordinary skill in the art at the time of the invention to employ the recess as taught by Schwartz in order to prevent lateral outward movement of the pillow pieces of Chou.

Art Unit: 3673

Claim 7, wherein the recess of the left end piece and the recess of the right end piece have a width, which is about the same as a dimension of the pillow (fig. 1)(Schwartz).

Claim 8, wherein the recess of the left end piece and the recess of the right end piece have a width and a height, which is about the same as a width, and height of the pillow (Schwartz).

Claim 9, further comprising:

inserting the pillow, the left end piece, and the right end piece into a sleeve 21 while the left portion of the pillow is inserted into the recess of the left end piece and while the right portion of the pillow is inserted into the recess of the right end piece (Chou).

Claim 10, further comprising inserting the sleeve, the pillow, the left end piece, and the right end piece into a pillow covering 1, while the left portion of the pillow is inserted into the recess of the left end piece, while the right portion of the pillow is inserted into the recess of the right end piece, and while the pillow, left end piece, and right end piece are inserted into the sleeve.
